

Role of the EU Missions in the next framework program ?

Discussion on the future of the EU Missions and the TRAMI Mission Playbook Launch

Tuesday 25 June, 13:00 – 16:15

NCBR Brussels Office (5th Floor), Rue Belliard 40, Brussels

In the past two years, the project on TRAnsnational cooperation on MISSIONS [TRAMI](#) collected the experiences of many European regions and countries. We undertook to condense these experiences into a ‘Mission Playbook’, which highlights a few of the many interesting examples of practical implementation of missions. At this event we will present the print version of the Mission Playbook and discuss some of the main lessons with authors and representatives of the countries and regions.

At the same time, we want to look forward and – in the next session of the event – discuss how to further develop and anchor missions in the context (but not confined to!) FP10. Also for this purpose we can rely on the work of TRAMI and the debates which took place in the European Mission Forum and the Mutual Learning Events, which are summarized in a Policy Brief as an input to this discussion.

Agenda:

13:00 – 14:00	Registration and networking lunch
